# Downgrading Your Java Version

If you have updated Java 11 and would like to revert to a previously installed version, follow these directions:

If you do not have an earlier version of Java installed, you can download Java 9 here or you can download Java 8 here.

1) Use the built in search feature of windows to find "Configure Java"

2) Uncheck versions of Java you do not want to be active:

Web Enabled	Platform	Product	Architecture	Type	Path
✓ ②	10	10.0.1	x86_64	System	C:\Program Files\Java\jre-10.0.1\bin\javaw....
✓ ③	10	10.0.1	amd64	User	C:\Program Files\Java\jdk-10.0.1\bin\javaw...
✓	9	9.0.4	amd64	User	C:\Program Files\Java\jdk-9.0.4\bin\javaw....
☐	1.6	1.6.0_26	amd64	User	C:\Program Files\Java\jdk1.6.0_26\jre\bin\j...

(Tabs: General | Update | **Desktop Settings** ① | Web Settings | Security | Advanced | S)

In this example, after unchecking Java 10, Java 9 will be set as the active Java run time to be used.
