

## A leading enterprise asset management solution.

Make the right decisions for your community. Connect with your asset data and streamline your operations to serve your community best. Citywide Assets allows you to easily manage all your assets with confidence.

### Calculate asset replacement costs

Track and assess your asset conditions to calculate upcoming asset replacement costs.

### Evaluate asset life and model risks

Forecast lifecycle events, future costs and make risk calculations to better plan and prioritize resources.

### Create asset profiles and reports

Run custom, automated reports and asset profiles for advanced analysis and efficient planning.

### Easily map your assets

Seamless integration with Citywide GIS and third-party GIS solutions to visualize assets, condition data and risk measurement.

### Set unlimited asset attributes

Enhance your asset records and empower better decision-making with custom configurations.

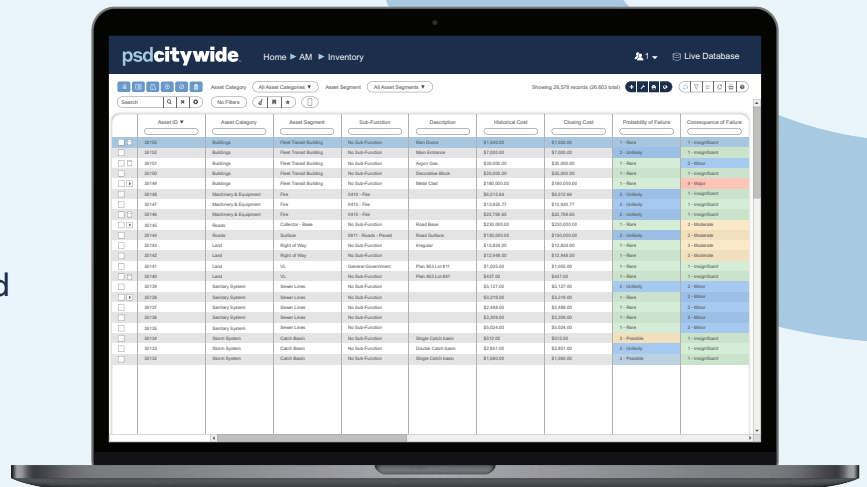

### Design your own asset data hierarchy

Create a data registry. House all of your municipal assets in one secured, user-friendly software platform. Track asset inventory, sort, filter, import and export data with ease.

# Streamline your workflow

Save time and get better results with software that works for you.

Evaluate asset conditions, optimize long term capital expenditures, strengthen the reliability of capital assets over time and make data-driven infrastructure and planning decisions with Citywide Assets. Trust in a solution that improves data accuracy, saves time and eliminates manual-entry errors.

## Enhanced Features

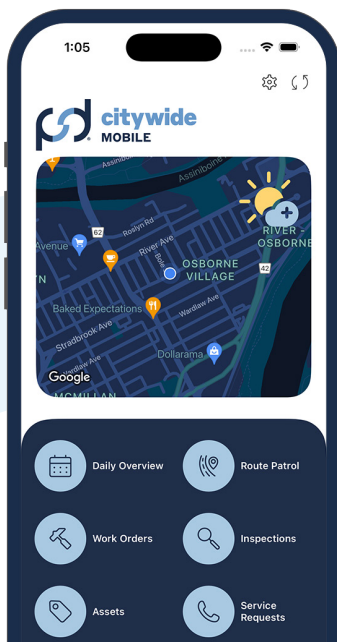

### Citywide Asset Collector

Empower your field staff. Allow them to collect data, upload images, update attributes and asset conditions on-the-go with Asset Collector on the Citywide Mobile app.

### Citywide Decision Support

Apply predictive modeling to project optimal funding requirements and levels of service across all asset categories.

Available on iOS and Android

“ Asset management software is important for us right now. We need a consolidated place for our inventory so we can have input from across the organization. ”
