

Leverage the power of your geospatial data.

Improve communication and make data-driven decisions with Citywide GIS – a leading Geographic Information System (GIS). Easily manage land use planning and connect with your community by creating a tailored map just for them.

Consolidate your assets

Simplify your operations. Manage your entire organization's GIS data in one secured location via web or mobile app.

Create custom map views

View what matters to you. Add custom filters, symbols, parcel and property layers, and text styles.

Generate asset reports

Quickly analyze and share data. Generate visual asset reports and make informed decisions for your community. Use SQL queries to pull specific asset reports.

Apply asset IDs

Powerful analysis and communication related to average asset condition, replacement cost, risk ratings, work orders and more.

Filter by layers

Create parcel and property layers to visualize specific asset types. Style your layers by attribute and filter them by risk, asset condition and more.

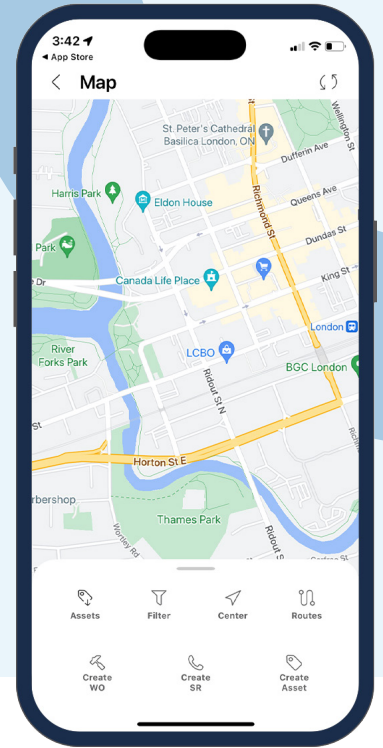

Digitize spatial data

Track every asset. Digitize features from aerial photos or imported GPS data for assets such as buildings and roads, mapping new subdivisions and natural features.

Make smart decisions for your community

Stay prepared with advanced GIS data analysis you can count on.

Map your asset data to enhance infrastructure planning capabilities, communication and visibility on one easy-to-use software platform. Share information, such as road, park and trail statuses with your citizens. Decide exactly what you want to show and how to stay connected with your community.

Available on Android and iOS

Enhanced Features

Empower your field staff

Collect data, upload images, update attributes and asset conditions on-the-go with the Citywide Asset Collector on the Citywide Mobile app. Save time and increase team productivity.

Enhance your GIS and asset management programs

Improve your datasets and obtain insights and strategies to enhance your EAM programs with the Citywide Geodata Builder

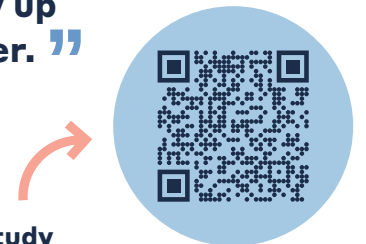

Upgrade your municipal management experience

Citywide GIS fully integrates with all Citywide Platform Solutions and third-party eGIS solutions. View all service requests and work orders on a map with Citywide Maintenance, and all associated asset data with Citywide Assets.

“ These systems are truly touching every side of our County operations, creating a seamless hand off of data from those in the field all the way up to the rate payer. ”

- Teresa Gratrix,
Camrose County
